## Holding Headaches at Bay

### Bodywork Eases Migraines and Tension Headaches

Cathy Ulrich

"Do you get headaches?" I asked Cindy. She had come to see me for massage to address her neck and shoulder pain but hadn't mentioned headaches.

"Well, yes," she said. "I've always had headaches and, now that you mention it, they seem to be worse when my neck hurts." Cindy went on to say she suffered from them as often as 2-3 times a week and typically treated them with ibuprofen.

Like many Americans, Cindy suffers from chronic, frequent headaches. Her neck pain finally prompted her to seek help, but she was so used to the headaches, she thought they were something she simply had to live with.

#### MIGRAINES.

Migraine headaches occur when the blood vessels in the brain become dilated, usually due to a chemical reaction, such as food allergies or a stress response. They often start with visual disturbances and quickly develop into severe head pain accompanied by nausea, vomiting, dizziness, and sensitivity to light. They're usually felt on one side of the head, but can be on both sides. Migraines are often managed with medications and avoidance of foods known to trigger them, such as red wine, chocolate, aged cheese, and nuts. However, some bodywork techniques can also be effective in easing migraines or decreasing the frequency of these painful headaches.

#### TENSION HEADACHES.

Exaggerated by stress, tension headaches are related to poor posture, jaw problems (such as temporomandibular joint disorder, or TMJ), and neck pain. Many people describe a headache that starts at the base of the skull and then moves in an arc over the ears and behind

*"Happiness is in itself a kind of gratitude."*

-Joseph W. Krutch

Freedom from chronic headaches is an option many Americans don't even realize is possible.

What Cindy didn't understand was that frequent headaches are not normal and, with a little proactive planning, there is something that can be done to manage and even prevent them.

## Types of Headaches

Headaches come in many varieties. Following is a short list of the most common types.

#### Office Hours and Contact

the eyes. Tension headaches are most often caused or exacerbated by poor posture, work station positions, and body mechanics, creating undue stress on the upper neck muscles.

#### MIXED HEADACHES.

The term mixed headache is used to describe a tension headache that leads to a migraine. Typically, the tension headache starts first and the chemicals produced from the pain of it create conditions for a migraine to develop. In people with patterns of mixed headaches, the best way to avoid the onset of a migraine is to treat the tension headache.

## Bodywork Options

A treatment regimen that includes bodywork, attention to body position, and stress management can help prevent or greatly reduce the frequency of headaches, in turn reducing your reliance on medication and the need to avoid food triggers. There are many different bodywork techniques, each with specific approaches for treating headaches. Following is a short list of techniques often effective in treating recurring headaches.

#### SWEDISH MASSAGE.

A tension headache, by its very name, implies the presence of stress and tension. Swedish massage, on the other hand, promotes relaxation and relieves muscle tension. When muscles become tight due to stress or poor posture, they eventually adapt a chronically shortened state. Swedish massage teaches the body how to let go of muscle tension and resets muscle tone.

#### INTEGRATIVE BODYWORK.

Rolfing, Hellerwork, Structural Integration, and CORE are examples of the types of bodywork designed to improve posture and structural alignment. A primary cause of chronic headaches is poor posture, which produces tension in the neck and shoulders because the weight of the head is not properly balanced on top of the spine. Integrative bodywork can produce lasting postural change for greater ease of movement. By selectively freeing the soft tissues, integrative bodywork literally can change postural alignment and remove the stresses and strains on the muscles that cause headaches.

#### DEEP TISSUE THERAPIES.

The integrative therapies mentioned above, as well as neuromuscular therapy and myofascial release, use similar techniques to free connective tissue. A chronically tensed muscle tends to maintain that tension, even after the stressful event has passed. Deep tissue techniques free the connective tissue glue, creating a new way for the muscle to function.

#### REFLEXOLOGY.

Like acupuncture, reflexology works to move energy blockages in the body. By stimulating points on the feet that correspond to organs in the body, reflexologists can promote relaxation, reduce pain, and restore energy flow. Several scientific studies have shown that reflexology is a viable treatment for migraines, in some cases working as well as, or better than, medication--and without the side effects.

#### CRANIOSACRAL THERAPY.

Craniosacral therapy addresses the inherent, gentle, rhythmic movement of the bones in the skull and their effect on the fluid that surrounds, bathes, and cushions the brain and spinal cord and runs throughout the body. Cranial bones move in miniscule amounts as a response to the production and absorption of cranial fluid. With head trauma, whiplash injury, or even severe stress, cranial bone movement can be compromised, resulting in headaches, dizziness, ringing in the ears, or vision disturbances. This therapy restores the normal movement of the cranial bones and fluid.

By addressing the root of the problem, regularly scheduled bodywork sessions can greatly reduce headaches as well as your need for medication. Remember, headaches are not normal, and you don't have to live with them.

**Reflexology has proven as, or more, effective than medication--without the many side effects.**

# What Is Reiki?

## Understanding Energy Work

A type of energy bodywork, reiki (pronounced ray-key) relies on the ancient belief in the life force energy, referred to as chi, that flows through all things. This life force runs throughout pathways in the body called meridians, nourishing organs and cells and supporting vital functions. When this energy is disrupted by negative thoughts, feelings or actions, illness and disease result. A reiki practitioner's hands hover just above a person's body, sensing the affected areas and infusing them with positive flow. This raises the energetic vibration and breaks up the negativity to heal, clear and restore the natural flow of the life force. The reiki practitioner, trained to access and serve as a channel for the life energy, places his hands on or just above the client's body and uses a passive touch that some clients experience with warmth or tingling. The hands remain in position for 3-5 minutes, alternately covering 10-12 positions over the body.

Thought to be Tibetan Buddhist in origin, the practice of reiki is comprised

of three levels of training. Through this training, the practitioner learns how to access energy flow through the hands to heal. Completion of the third and highest level of training results in the title of reiki master. Reiki is used to accelerate healing, assist the body in cleansing toxins, balance the flow of subtle energy by releasing blockages, and help the client contact the healer within.

According to [www.reiki.org](http://www.reiki.org), reiki is beginning to gain acceptance as a meaningful and cost-effective way to improve patient care in hospitals and clinics across America. In an interview on the website, Dr. David Guillion, an oncologist at Marin General Hospital in California, says, "I feel we need to do whatever is in our power to help the patient. We provide state of the art medicine in our office, but healing is a multidimensional process. I endorse the idea that there is a potential healing that can take place utilizing energy." For more information, consult your bodywork practitioner.

Reiki balances subtle but vital energy.

# The Scoop on Meditation

## A Simple Practice with Profound Benefits

People who meditate regularly appear internally and externally five to 10 years younger than their non-meditating peers, according to author Deepak Chopra. That's good news for the estimated 10 million people who practice meditation on an ongoing basis and experience the resulting calm it cultivates.

The rich benefits come from doing something that looks like nothing: Sitting still, being quiet, and breathing deeply. Meditation works simply but profoundly by defusing the onslaughts of life -- a racing mind, busyness, deadlines, commutes, all of which have physiological effects on well-being. Meditation calms the nervous system, decreases metabolic rate, heart rate, and

blood pressure, and lowers levels of cholesterol, stress hormones, and free radicals. It also has a direct effect on breathing, slowing and deepening respiration so more oxygen circulates throughout the body. Not only that, meditation is said to lessen feelings of anxiety and depression and improve memory and concentration. And all of this culminates in slowing the aging process, as Chopra notes.

There are many meditation techniques, including focusing on a mantra, a sacred word or phrase, or your breath. But the basic intent of all meditation is focus and attention. And it doesn't take hours a day in an ashram to meditate effectively. Benefits kick in with even a short period of devoted time.

How to begin? Wear comfortable, unrestrictive clothes, sit on a cushion or chair with your back straight (think once again, comfort), rest your hands on your legs, let your eyes go soft and out of focus or close them, breathe slowly and deeply, and -- the hardest part -- attempt to empty your mind of thoughts and quiet the internal dialogue. When thoughts flit through your mind, let them pass without judging them and come back to your focus (your mantra, counting, etc.) and breathing.

Start with this sitting meditation technique for five minutes a day, and add on time as you get more at ease with the process. For more information on techniques and benefits, check out [www.abc-of-meditation.com](http://www.abc-of-meditation.com).

*"Our greatness  
lies not so much  
in being able to  
remake the  
world as being  
able to remake  
ourselves."*
